CRANES CABIN

CRANES, THE HEART OF THE LOGISTICS PROCESS

It's essential for your operator to have an ergonomic workplace with a good overview of the terrain and the goods that need to be moved. A pleasant indoor climate in every season helps the operator stay alert and fit. This, in turn, contributes to the production and efficiency of your process. We integrate sightlines with window posts in the right place, an ergonomic seat, the right working posture, the accessibility of the cabin and the layout of the controls into the design of your crane cabin. We also supply ship unloader cranes, gantry cranes, overhead cranes, grab cranes, mobile cranes, harbor cranes, bulk transshipment installations, straddle carriers, construction cranes and offshore cranes.

OUR PRINCIPALS

METAGRO

RTG Cabins

We have been building RTG cabins for the RTG cranes at ports & terminals for the past 35 years. We create ergonomic and comfortable working environments for crane operators to increase their overall productivity and efficiency.

STS Cabins

We build STS cabins with many options that enhance safety, efficiency and ergonomics. We can fully customise the design of this quality cabin to meet specific customer needs.

RMG Cabins

To reduce the loading and unloading time of large container vessels, the container storage location has to be managed in the most efficient way.

TERMINAL & YARD TRACTORS

Terberg tractors stand out by their robustness, low fuel consumption, easy maintenance and driver comfort. This makes them an efficient option for many operations and although the basic designs are standardised, practically every tractor we deliver is customised.
